

Newsletter February 2009

Hello again

Firstly I would like to say that Ian Coaker has gone into hospital today for a hip replacement and that all club members wish him a full recovery.

At the committee meeting this month it was decided that the forum should stay in place.

As many of you are aware, the club has started a forum which you can enter via the club's website. This forum has taken off in a big way & you can post your comments, pictures & any other thing you want - within reason. We still need club members to join this forum so let's get you in on the action and get your new models posted!

There has been a lot of flying at the field recently with many members braving the cold. Flying over a snow-filled runway - good fun it is.

The field is in need of repair with about 80% moss on the runway. When you are landing most times the moss will overturn your plane. So we need to scarify the field, and we need volunteers so let's have your name put forward.

Some members want the committee to look for another field for us to fly from - which is a good idea as many of the older members are getting on a bit, struggling up and down the hill with models and bags or flight boxes. This does not mean we will get rid of the old field but we must move with the times. So if anyone knows of a field, contact the committee.

We would appreciate all members that have not paid this years dues to pay them a.s.a.p. and if you know of anyone interested in joining the club get them to join up. We need as many members as we can get - young or old - join them up!!.

Lastly, I saw Ian after the op. He is doing fine and we all wish him a speedy recovery.

Ricky McKnight
